

Product Compatibility

Following is a comprehensive list of all the Pure Romance products and their compatibility with latex and polyurethane condoms, as well as other barrier birth control methods. This list includes compatibility based on both “Direct” contact (applied directly to the area where the birth control method is used) and “Indirect” contact (not applied directly, but where contact with the barrier birth control method is possible).

PRODUCT	COMPATIBILITY				PRODUCT	COMPATIBILITY

Just Like Me	Yes	Yes	Yes	D	X-Scream	No	Yes	No	D
Kiss	Yes	Yes	Yes	I					

IMPORTANT NOTE: For example, if a person performs a massage with Pure Romance’s Aura Massage Oil, (which is listed as an Indirect contact product with your barrier birth control methods), and then applies a condom without first washing their hands, Aura can break down the material of the latex birth control method, potentially making it ineffective. It is important to recommend a back up birth control method other than latex products when they have the potential to come in contact with a product containing oil.
